

## November 2025 – How to Fight Key Fob Cloning

Criminals are now able to copy your car's key fob even if it is inside your locked home – and you would not even be aware that it is happening. Fortunately, there is a simple, low-cost solution. It's called a Faraday pouch. They are constructed with material that blocks wireless signals. It's a good idea to take the pouch with you when you go out so it stays protected when you are shopping or dining.

You can find a pouch on [Amazon.com](https://www.amazon.com) or at various other online stores.
